

importance of lemma 2.3

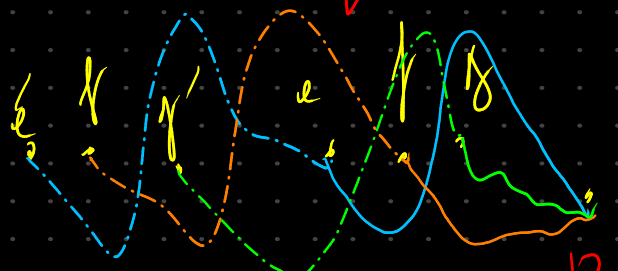

(Theorem 3.1)
and 2)

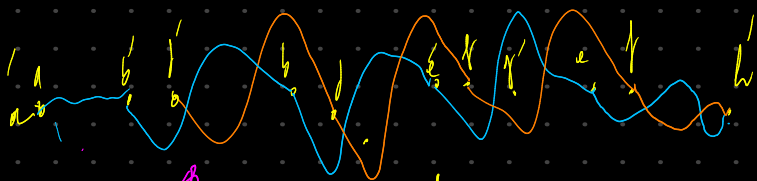

we can look at it like

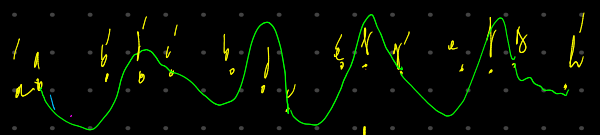

back to lemma 2.3

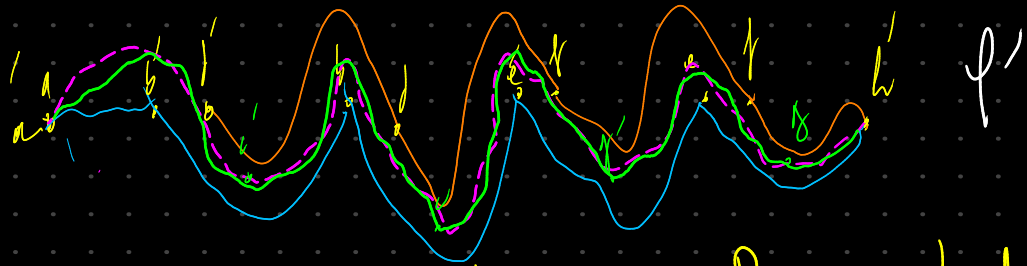

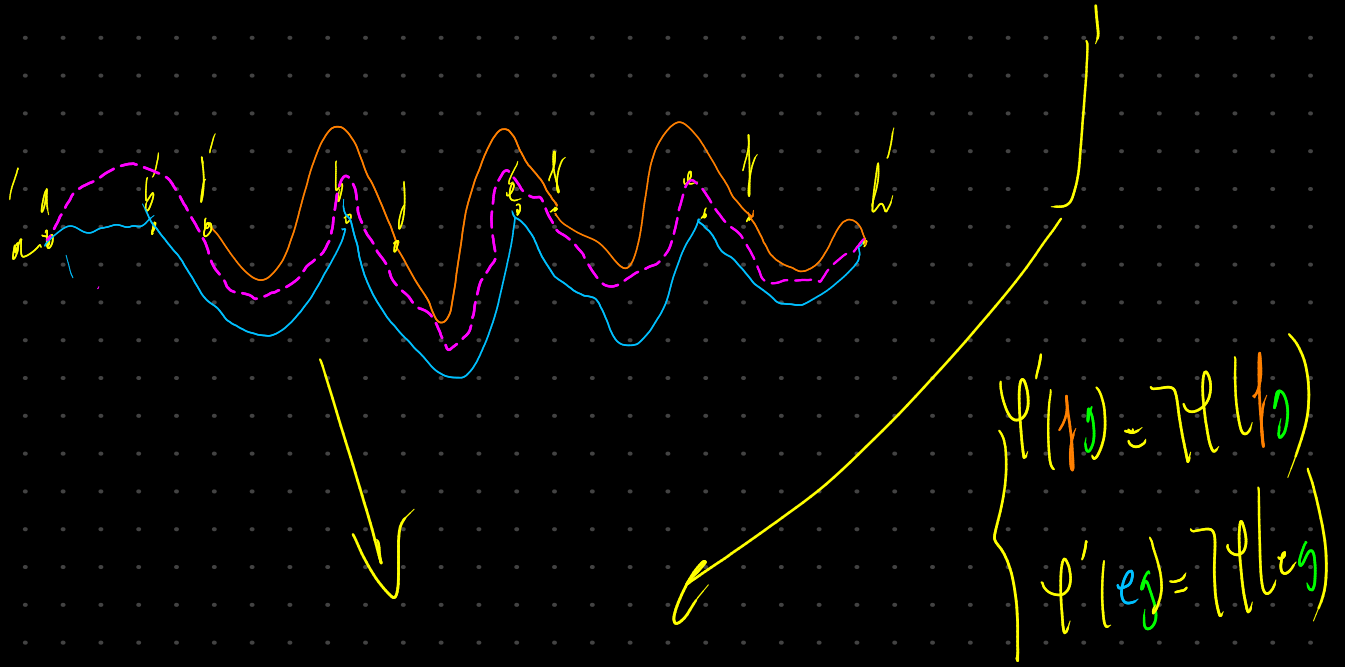

odd crossing with
m edge in between
in the rotation
(Theorem 3.1)
cases

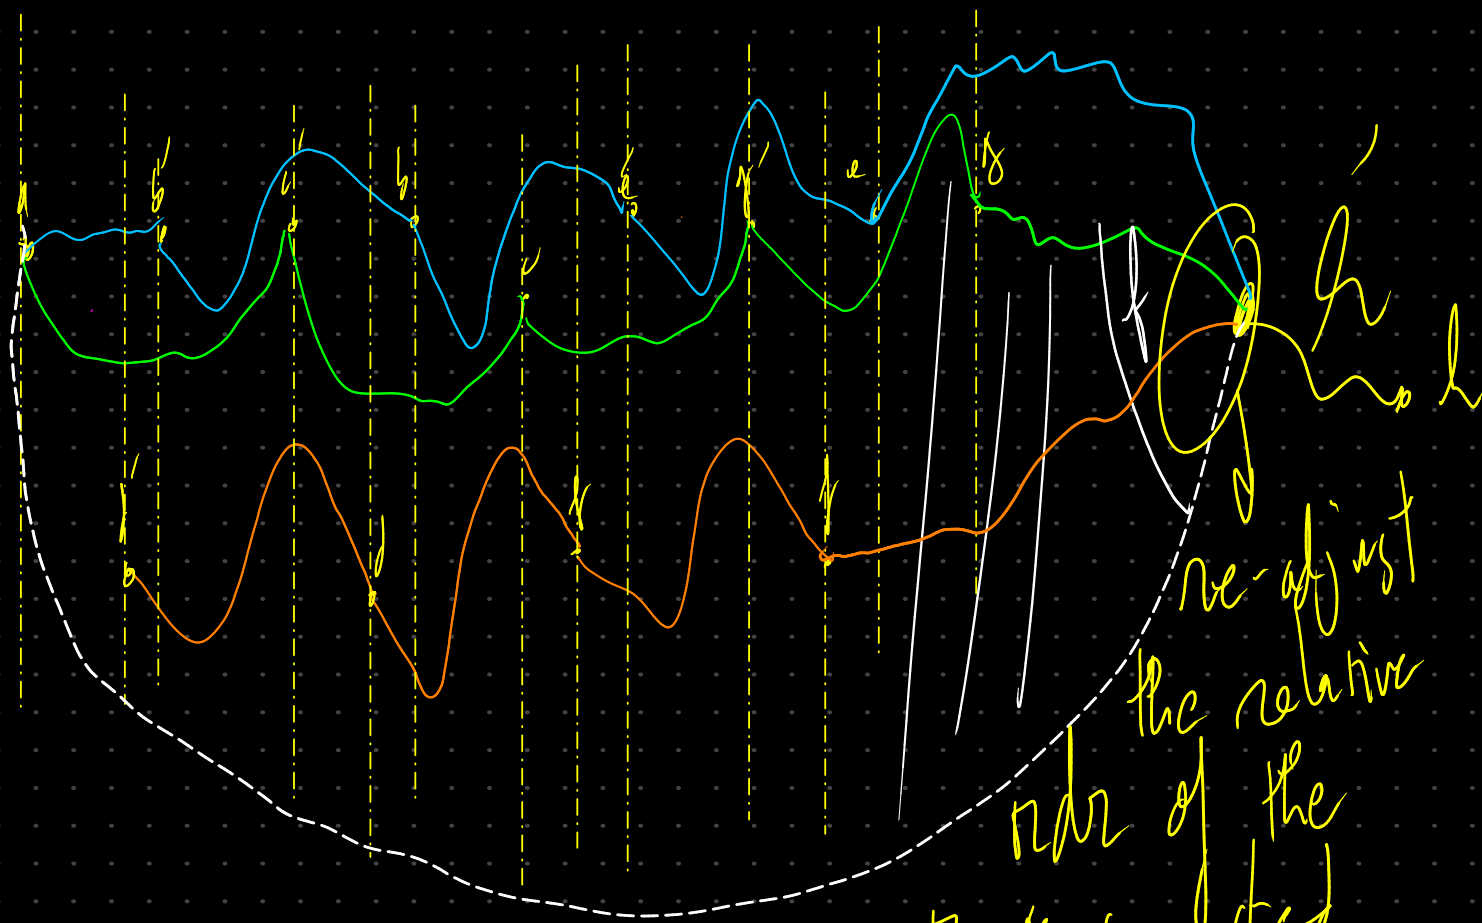

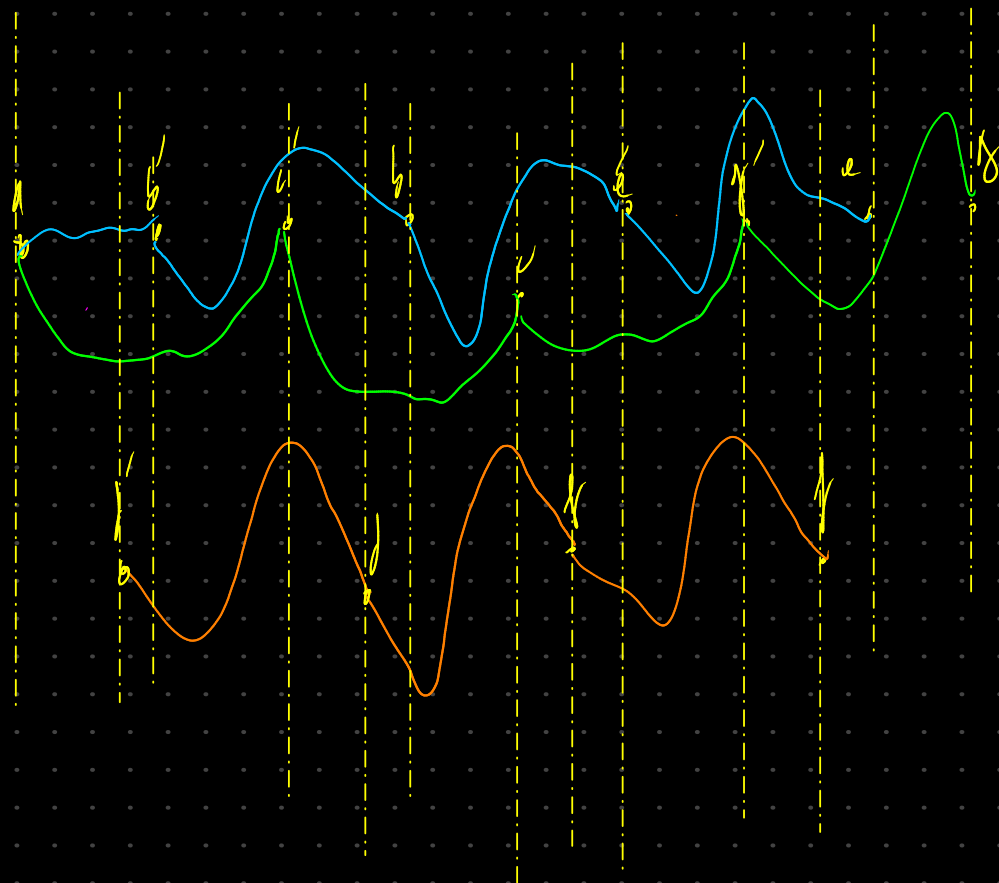

Weak Lemma 4.1

if we start the construction of the embedding from the right we end up with this case

if we start from the left of h

re-adjust the relative
range of the
comp to the ndr
in the rotation of h
